REGIONAL KATOOMBAS: TROPICAL AMERICA

TAKG Network

One of the main goals of the Katoomba Group network is to strengthen the knowledge base of our partners in the network in the realm of Payment for Ecosystem Services. We seek primarily to collect, analyze and disseminate learning from the actions of our partners, and to facilitate linkages and interaction between us to successfully take on critical opportunities to bring new financing to conservation with strong development impacts.

Our primary methods include convening and participating in events, developing and documenting knowledge in publications and other formats, and disseminating new material describing the state of play of the markets, and the challenges and roles of the various institutions in the evolving market. We offer a web-based platform for our partners to use to advance their work.

Main Network activities include:

- > Convening workshops, networking events and participating in Katoomba partner events where we share materials, take key speakers and offer speaking opportunities to Katoomba partners to share their experiences and present the latest information on ecosystem markets
- > We design and carry out tailored courses for specific audiences on topics of interest in Payment for Ecosystem Services.

- Deposito de herramientas de la red de socios de acuerdo a pasos en diseño
- Conexiones e intercambios de información entre la red multi-sectorial
- Iniciativas prioritarias de la red

Acciones Prioritarias de REDD con la red Katoomba

“Repuesta Rápida” Técnica y Política

- Incubadora de Servicios Ecosistémicos
- Iniciativa de Marcos Legales e institucionales para PSA

Iniciativa de Marcos Legales analizando temas prioritarios para

- Participantes en transacciones, y para gobiernos instituyendo programas y políticas
- Análisis por país: Colombia, Brasil, Perú y Bolivia (agua y carbono). Expansión a nuevos países
- “Issue Briefs” en temas críticos sobre el mercado, la propiedad del carbono, etc.

Talleres de REDD trabajando iniciativas de gobiernos y clínicas de proyectos

REDD: Amazonia Brasileira -Mato Grosso (Abril 09), Área MAP (Feb 09), Andes Tropicales (Abril '10), Ghana (Julio '09), Sureste Asiático -Delta del Mekong (Nov '09)

Materiales y Publicaciones

- Estado del Mercado de Carbono Forestal
- Manual Paso a Paso: versión dinámica con nuevos estudios de Caso
- Herramientas legales y de diseño de proyectos

New Zealand's Billion-dollar Question

When New Zealand's Labour government signed on to the Kyoto Protocol in 2002, policy projections suggested that the country would meet its emissions targets with ease, allowing it to sell surplus 'credits' into the global carbon market at considerable gain. Not so, say revised reports issued by New Zealand's Climate Change Office this year. Due to a stronger than expected economy and some fine print concerning the inclusion of forest sinks in the Kyoto Protocol, New Zealand now finds itself facing a Kyoto debt as large as half a billion dollars (NZ). Ecosystem Marketplace considers whether the Kiwis will jump ship or stay the course.
